

September 2020

Next Board Meeting

**Time and place to be
determined**

From the Presidents Pen

Hello To Everyone!

Crazy to think that another month has gone by and honestly I'm glad that August is over and we're headed into some cooler weather!

I spoke with Zach with BLM this morning for an update and this is what I found out. At this time BLM has not scheduled a startup date for Partners Point.

There is a new Storage Container "CONEX" that has been delivered and will be set up in the area where we do our bundling of brush for additional storage of supplies. Supplies that have been Received for startup:

Steel Banding coils.

40 Boxes of rope.

1000 Sand bags.

23 Tons of Sand.

Both BLM Boats are scheduled for their annual Maintenance over the next two weeks.

Big changes are coming to Partners Point and the Monies to do so have been approved and are in the budget.

The existing building will be receiving an addition to the front to create additional offices.

All shade covered areas will be receiving New Structure and cover.

The Plan is to concrete the entire property.

Just as soon as I get the heads up that it's time to get restarted I will let everyone know. Looking forward to working with everyone this fall.

Stay safe out there and all the best to everyone.

Rod Hatchell

From the Vice Presidents Desk

Last month I asked if anyone had suggestions for an article in the newsletter to replace Dave's tackle tips and one of our members Vince Randino suggested maybe our members would send in fishing reports, tips, techniques and of course we always love the photos of your catch even the ones that are so small they make us laugh. We all can use cheering up these days, so how about it do you have anything to send in??? It doesn't even have to be about fishing, gotta good joke??? Heres one for you,

Why was the cheetah so bad at hide and seek?

No matter where she hid she was always spotted

We took our boat over to Partners point yesterday to see if they have started any of their projects yet and nothing has changed so far, except the new Conex is there next to the sandbag machine. The paved road looks nice so now it wont be so hard on our vehicles when we get back to making brush bundles. I put the photo of the road in for another look.

Till next month stay safe and don't forget to send in your fish tips and photos.
